Letter of Reference for Mr Emmanouil Giannakis

I have known Mr. Emmanouil Giannakis in my capacities as a Professor in University of Piraeus and Director of the AI Lab at Department of Digital Systems.

Mr. Giannakis completed his last year thesis in collaboration with Dr Evangelia Drakopoulou at the Inst. of Nuclear and Particle Physics at NCSR Demokritos, under my partial supervision. He collaborated with colleagues in the ANNIE project, addressing deep learning challenges associated with neutrino detection and interaction reconstruction. His Bachelor thesis focused on the implementation and evaluation of Graph Neural Networks (GNNs), a topic that is not the subject of any of the courses at the pre-graduate level in our department. This, in conjunction to the fact that his thesis was on a demanding application domain (particle physics) show the background, skills, interests and abilities of Mr. Giannakis.

Overall, Mr. Giannakis did very well in his pre-graduate studies in our department, but by pursuing this thesis he showed his high proficiency and great dependency, as well as his ability to work in a team, share and leverage ideas.
Concluding he is a fast learning person, with great attitude and motivation, creative, with knowledge, skills and willingness to expand his knowledge and professional horizons.

I am absolutely sure that he will pursue his MSc studies with great success.

Sincerely,

George Vouros
Professor
